

In cooperation with its regional partner, the Brazilian Business Council for Sustainable Development (CEBDS), GIZ and SEB organize this half-day symposium on **Greening Capital Markets in Brazil – Paving the Way for Green Bonds** on 28 June 2016 in São Paulo.

The objective of the symposium is to discuss, jointly with finance professionals, companies, policymakers, and international and domestic experts, next steps to pave the way for green bonds and how to support the green financial transformation in Brazil. In particular, the event serves to lay the foundation for a unique multi-stakeholder approach pursued by the Strategic Alliance in order to provide advisory and technical support tailored to the specific needs and interests of all stakeholder groups in the Brazilian market for green bonds: financial institutions, investors, potential public and private sector issuers, regulators and second opinion providers.
